

# Living Life: Enhancing Life Through the Senses

Clients living with dementia lose skills, roles, recognition of family and freedom - what remains is ability to savour sensory pleasures of life

- + Supportive Therapy Model
- + Sensory stimulation - what role does it play?
- + Recognizing retained pleasures of taste, texture, sight & smell amidst losses
- + Food experience as Supportive Therapy Model encouraging muscle memory, life skills, functional/sequential ability & rehabilitative memories
- + Maximize functionality, divert behaviours & minimize risk from behaviours
- + Sensory specific programming & measurement tools

★Recommended Option

Target	Front-Line Staff	Registered Staff	Managers
	●	●	

Schedule	1 Hr*	1½ Hr*	3 Hr*	Full Day	Multi-Day
		● ★	●		

\*can be repeated multiple times throughout the day.

Extras	Handouts	Posters	Certificates	Info Binders
	●	●		

NOTES:

This training module may be repeated to allow the rotation of staff through the sessions, while minimizing replacement costs. Alternatively, it is possible to mix/match different topics for a variety of presentations within a single seminar day. May be presented by Patricia Butcher.
